

Ideation Phase

Define the Problem Statements

Date	31 January 2025
Team ID	HYD-METRO-2025
Project Name	Hyderabad Metro Rail – Digital Ticketing System (ServiceNow)
Maximum Marks	2 Marks

Customer Problem Statement Template

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. It helps empathize with customers and better understand how they perceive your product or service.

I am	<i>Describe the customer — their characteristics and who they are.</i>
I'm trying to	<i>List their outcome or 'job' — what are they trying to achieve?</i>
but	<i>Describe problems or barriers — what stands in the way / bothers them most?</i>
because	<i>Enter the root cause of why the problem or barrier exists — what needs to be solved?</i>
which makes me feel	<i>Describe the emotions from the customer's point of view — how does it impact them emotionally?</i>

Problem Statement PS-1: Daily Commuter (Ticket Booking)

Field	Response
Problem Statement	PS-1
I am (Customer)	A daily metro commuter in Hyderabad — a working professional or student aged 18–45 who travels on the metro.
I'm trying to	Purchase a metro ticket quickly and conveniently — ideally from my mobile device before reaching the station.
but	There is no digital or online ticket booking option available for Hyderabad Metro Rail. I am forced to stand in a long queue at the ticket counter.
because	The metro authority has not yet implemented an Automated Fare Collection (AFC) system or a digital ticketing system.
which makes me feel	Frustrated, stressed, and anxious every morning. I feel that my time is being wasted daily on a preventable issue.

Problem Statement PS-2: Station Manager (Operations & Tracking)

Field	Response
Problem Statement	PS-2

I am (Customer)	A metro station manager at Hyderabad Metro Rail responsible for overseeing daily operations, managing
I'm trying to	Get a real-time, accurate view of daily ticket sales, passenger volumes per route, and revenue collection
but	All ticket data is recorded manually in registers or basic spreadsheets. There is no centralized digital system
because	The metro ticketing process is fully manual and offline, with no backend database, automation, or reporting
which makes me feel	Overwhelmed, under-equipped, and unable to do my job effectively. I feel I am managing a modern metro

Problem Statements Summary

PS#	I am	I'm trying to	but	Because	Which makes me feel
PS-1	Daily metro commuter (working professional/student)	Book metro ticket quickly	No digital ticket booking exists	No digital ticketing platform	Frustrated, stressed, and anxious every morning
PS-2	Metro station manager (operations supervisor)	Get real-time view of bookings	All data is manual, offline, and in spreadsheets	No centralized digital system or backend database	Overwhelmed and unable to manage operations

How ServiceNow Solves These Problems

Problem	ServiceNow Solution
No digital ticket booking channel	Service Catalog item 'Book A Metro Ticket' accessible via Service Portal (/sp)
Manual fare calculation errors	Catalog Client Script auto-calculates fare on route & journey type selection
No QR code / digital ticket	OnSubmit Client Script generates QR code via GlideModal on form submission
No data record of bookings	Flow Designer automatically creates records in Metro Database custom table
No visibility for station managers	Role-based ACL with reporting views on Metro Database for authorized managers
Cash-only payment	Payment mode variable supports UPI, Card, Wallet, Cash, Others in catalog form
