

Ideation Phase

Empathize & Discover – Empathy Map Canvas

Date	26 June 2026
Team ID	
Project Name	Metro Ticket Generation System Using ServiceNow
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map captures knowledge about a user's behaviours and attitudes. The following empathy map is built around the primary user persona: the Daily Metro Commuter.

USER PERSONA: Daily Metro Commuter

THINK & FEEL	SEE
Feels frustrated with long queues and time wasted at manual counters	Crowded ticket counters with long queues at peak hours

• Worries about missing the train due to ticketing delays • Wants a faster, reliable, and digital way to book tickets • Aspires to a seamless travel experience without cash dependency	• Manual token-based ticketing systems with limited digital options • Other commuters using mobile apps in other cities • Limited self-service kiosks with frequent outages
HEAR	SAY & DO
• Friends and colleagues talk about digital metro apps in other cities • Announcements about government digitization of public services • News about contactless payment integration in urban transport	• Arrives early at the station to avoid peak-hour queues • Carries exact change to speed up the counter transaction • Expresses frustration verbally to fellow commuters • Searches online for digital ticketing solutions

PAIN	GAIN
• Long queues and manual processing delays • Manual errors in fare calculation and ticket issuance • No digital record of past travel or booking history • Cash dependency and no contactless payment option • Risk of missing train due to ticketing delays	• Quick digital ticket booking from anywhere, anytime • Automatic fare calculation — no manual errors • Centralized booking records accessible to commuters and admins • Time savings and improved travel planning • Future: contactless payment and QR code entry
