

Requirement Analysis

Customer Journey Map

Project Name	Metro Ticket Generation System Using ServiceNow
Persona	Daily Metro Commuter
Scenario	Booking a metro ticket via the ServiceNow Service Portal

ENTICE (Awareness)	ENTER (Access)	ENGAGE (Core Steps)	ENGAGE (Submit)	EXIT (Confirmation)	EXTEND (After)
Commuter hears about the digital booking portal from a colleague or station announcement	Commuter logs into ServiceNow Service Portal and navigates to Metro Ticket Booking catalog item	Fills in: source station, destination, travel date, number of passengers. Client Scripts validate inputs and auto-calculate fare.	Reviews calculated fare, confirms details, and submits the ticket booking form.	Flow Designer triggers and creates a booking record. Commuter receives booking confirmation on screen.	Admin views booking in dashboard. Future: SMS/email notification, QR code generation, travel history.
GOALS	INTERACTIONS	POSITIVE MOMENTS	NEGATIVE MOMENTS	OPPORTUNITIES	EMOTIONS
Discover faster way to buy metro tickets	Web browser / ServiceNow Service Portal	Auto fare calculation saves time and ensures accuracy	May be unaware of the portal's existence initially	Promote portal via station signage and announcements	Frustrated → Curious → Confident → Satisfied
