

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	27 June 2026
Team ID	
Project Name	Metro Ticket Generation System Using ServiceNow
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the Metro Ticket Generation System.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Metro Ticket Booking	Submit booking via Service Catalog form with source, destination, travel date, and passenger details
FR-2	Fare Calculation	Automatic fare calculation based on route and number of passengers using Client Scripts
FR-3	Input Validation	Client Scripts validate mandatory fields (source station, destination, date, passenger info) before submission
FR-4	Booking Record Creation	Flow Designer triggers on form submission and creates a booking record in the custom Metro table
FR-5	Admin Dashboard	Administrators can view, search, filter, and manage all booking records via ServiceNow list view
FR-6	UI Policies	Control field visibility and mandatory status dynamically based on user selections on the booking form
FR-7	Business Rules	Automate backend processing logic such as status updates and data consistency checks on record creation

Non-functional Requirements:

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Service Catalog form must be simple and intuitive, enabling any metro commuter to book tickets without technical knowledge.

NFR-2	Security	Role-based access control ensures only authorized commuters and administrators can access and manage booking records.
NFR-3	Reliability	Business Rules and Client Scripts maintain data integrity and prevent invalid bookings from being created.
NFR-4	Performance	The catalog form and workflow must load and execute within acceptable response times under normal usage.
NFR-5	Availability	System is accessible 24/7 through the ServiceNow cloud platform with minimal downtime.
NFR-6	Scalability	The architecture supports expansion to multiple metro lines, cities, and future integrations such as payment gateways and QR ticketing.
