

Project Design Phase

Problem – Solution Fit Template

Date	27 June 2026
Team ID	
Project Name	Metro Ticket Generation System Using ServiceNow
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps developers and innovators identify behavioral patterns and recognize what would work and why.

1. CUSTOMER SEGMENT (CS)	6. CUSTOMER CONSTRAINTS (CC)	5. AVAILABLE SOLUTIONS (AS)
Daily metro commuters who travel frequently and rely on metro stations for their daily transportation.	Lack of digital infrastructure at stations, dependency on cash for tickets, limited awareness of online booking portals, time pressure during peak hours.	Manual ticket counters (slow, error-prone), token vending machines (limited availability), no centralized booking platform currently available.
2. JOBS-TO-BE-DONE / PROBLEMS (J&P)	9. PROBLEM ROOT CAUSE (RC)	7. BEHAVIOUR (BE)
Purchase metro tickets quickly without long queues; access booking records for future reference; book multiple tickets in one transaction.	Metro authorities rely on legacy manual systems with no digital integration. Absence of a centralized platform causes duplicate effort and record-keeping issues.	Commuters arrive early to avoid queues, carry exact change, and prefer routes with shorter queues. They search for digital alternatives online.
3. TRIGGERS (TR)	10. YOUR SOLUTION (SL)	8. CHANNELS OF BEHAVIOUR (CH)
Experiencing long queues during peak hours; missing a train due to ticketing delay;	Metro Ticket Generation System on ServiceNow: Service Catalog for digital booking, Client Scripts for fare calculation, Flow Designer for automation, and custom Metro database for record management.	ONLINE: ServiceNow Service Portal (web browser). OFFLINE: Admin Dashboard for station managers to

hearing about digital ticketing in other cities.		track and manage bookings.
4. EMOTIONS: BEFORE / AFTER (EM)	BEFORE: Frustrated, stressed, time-pressured due to long queues and manual ticketing delays. AFTER: Confident, time-efficient, and satisfied with instant digital ticket booking and automated fare calculation.
