

Project Design Phase

Proposed Solution Template

Date	27 June 2026
Team ID	
Project Name	Metro Ticket Generation System Using ServiceNow
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No	Parameter	Description
1	Problem Statement (Problem to be solved)	Traditional metro ticketing involves long queues, manual processing, and no centralized digital records. Commuters face delays and administrators struggle to track bookings efficiently.
2	Idea / Solution Description	A ServiceNow-based Metro Ticket Generation System using Service Catalog for digital booking, Client Scripts for validation and fare calculation, Flow Designer for workflow automation, and a custom Metro database table for centralized record management.
3	Novelty / Uniqueness	Applies ServiceNow — an enterprise ITSM platform — to a public transportation use case, showcasing its versatility for real-world citizen services beyond IT support.
4	Social Impact / Customer Satisfaction	Reduces commuter wait time, eliminates manual errors, provides 24/7 digital access for ticket booking, improves administrator efficiency, and modernizes public metro services.
5	Business Model (Revenue Model)	The platform can integrate digital payment gateways for fare collection. Future monetization through premium features like seat selection, travel history analytics, and corporate pass management.
6	Scalability of the Solution	Built on ServiceNow's cloud platform, the system scales to multiple metro lines, additional cities, and future enhancements including QR code ticketing, AI chatbot, mobile app, and real-time schedule integration.
