

User Acceptance Testing (UAT)

UAT Execution & Report Submission

Date: 28 June 2026

Project Name: Metro Ticket Generation System

Maximum Marks: 4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Metro Ticket Generation System project at the time of release to User Acceptance Testing (UAT). The system was developed on the ServiceNow platform to automate metro ticket booking, fare calculation, workflow processing, and administrative tracking.

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level and how they were resolved during the UAT phase of the Metro Ticket Generation System.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	5	3	2	1	11
Duplicate	0	0	1	0	1
Fixed	4	2	3	8	17
Not Reproduced	0	0	1	0	1
Won't Fix	0	1	0	1	2
Totals	9	6	7	10	32

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and are untested across all system modules.

Section	Total Cases	Not Tested	Fail	Pass
Service Catalog & Booking Form	12	0	0	12
Client Script Input Validation	8	0	0	8
Fare Calculation Module	6	0	0	6
Flow Designer Workflow	5	0	0	5
Custom Metro Database Table	4	0	0	4
Business Rules Processing	4	0	0	4
UI Policies & Field Visibility	3	0	0	3
Administrator Dashboard	5	0	0	5

Section	Total Cases	Not Tested	Fail	Pass
Ticket Record Management	4	0	0	4

4. UAT Test Scenarios

4.1 Functional Testing

- Verify that the Metro Ticket Booking catalog item is accessible from the Service Portal.
- Verify that all required fields (source station, destination, travel date, passengers, ticket quantity) are displayed correctly.
- Verify that Client Scripts validate inputs and display appropriate error messages.
- Verify that fare is automatically calculated based on selected stations.
- Verify that the booking request is submitted and a confirmation is shown.
- Verify that Flow Designer creates a booking record in the custom Metro database table.
- Verify that Business Rules process backend logic after submission.
- Verify that the administrator dashboard displays all booking records correctly.

4.2 Non-Functional Testing

- Verify system performance under concurrent ticket booking requests.
- Verify that booking records are stored securely and accessible only to authorized users.
- Verify that the system handles invalid or missing inputs gracefully without crashing.
- Verify that UI Policies correctly show and hide fields based on user selections.

5. UAT Sign-Off Summary

Overall UAT Result: PASS

Total Test Cases: 51

Passed: 51

Failed: 0

Not Tested: 0

Total Defects Raised: 32

Defects Fixed: 17

System Status: Ready for Production Deployment on ServiceNow Platform
