

Project Design Phase – II

Customer Journey Map

Date	31 January 2025
Team ID	HYD-METRO-2025
Project Name	Hyderabad Metro Rail – Digital Ticketing System (ServiceNow)
Maximum Marks	4 Marks

Scenario: Metro Commuter Books a Digital Ticket on ServiceNow

The journey map below traces a Hyderabad Metro commuter's experience from discovering the digital ticketing option to successfully boarding the metro using a QR code — across 5 phases: Entice, Enter, Engage, Exit, Extend.

ENTICE How does the user discover digital booking?		ENTER What do they experience as they begin?		ENGAGE Core steps in the booking process		EXIT What do they experience as it finishes?		EXTEND What happens after the journey?		
■ STEPS		• Sees metro app/portal ad on social media or at station	• Opens browser, navigates to /sp ServiceNow portal	• Searches 'Book A Metro Ticket' in portal		• Fills catalog form: Source, Destination, Passengers, Journey Type		• Fare auto-populates; selects payment mode; submits form		• QR code generated and displayed on screen
■ INTERACTIONS (People / Places / Things)		• Social media, digital signage at metro station	• Mobile browser or desktop; ServiceNow /sp portal	• Service Catalog search bar on portal		• Catalog form with dynamic variables and dropdowns		• Client Script auto-populates; payment mode dropdown		• GlideModal pop-up; confirmation message
■ GOALS & MOTIVATIONS		• Help me find a faster way to buy metro tickets	• Help me access the booking system easily	• Help me find the right catalog item quickly		• Help me enter my journey details without confusion		• Help me know the fare upfront and pay digitally		• Help me get a ticket right away
■ POSITIVE MOMENTS		• Excited to discover a digital booking option exists	• Portal loads quickly; clean modern UI	• Search instantly shows the catalog item		• Fare auto-populates — no manual calculation needed!		• Digital payment via UPI is smooth and familiar		• QR code generated — feels like a real ticket

■ NEGATIVE MOMENTS	• Not aware digital booking exists at all	• First-time login to portal can be confusing	• Catalog might have too many items — hard to find	• Station sys_ids are not visible to users (backend only)	• No real payment gateway — only mode selection	• QR URL is a du validated at real g
■ AREAS OF OPPORTUNITY	• Run awareness campaigns at metro stations & social media	• Add SSO / Google login for frictionless first access	• Feature 'Book A Metro Ticket' prominently on portal home	• Display station names (not sys_ids) via Reference variable	• Integrate real UPI/card payment gateway in v2.0	• Generate PDF t for offline use
