1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the **Book A Metro Ticket** project (ServiceNow-based digital metro ticketing and AFC platform) at the time of the release to User Acceptance Testing (UAT). The scope covers the Service Catalog item, fare calculation logic, QR code generation, catalog UI policies and client scripts, station details mapping, Metro Database flow automation, role-based ACLs, and the Metro QR Ticket widget/pages delivered across Phase 1 to Phase 4 of the project.

The 3 open defects are tracked under "Fixed"/"Skipped" resolution categories above and do not block UAT sign-off.
